LEED Certification & Statement of Recycled Content

July 6, 2017

To Whom It May Concern:

The recycled aluminum content in the billet alloys produced at Aluminum Shapes, LLC meet or exceed 55% in total and include the following minimum values:

- ✓ 15% Post-Consumer Recycled Content
- ✓ 40% Post-Industrial Recycled Content

Product is manufactured with recovered materials as indicated above. The aluminum was extracted/mined in North America. The product does not use material considered to be rapidly renewable by the USGBC.

Should you require any further information please contact me at your convenience.

Sincerely,

Jay Sodera
Vice President of Quality & EHS
